

VELUX®

Skylights

Three great reasons to replace existing skylights when you replace a roof.

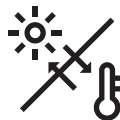

1 Save Money and Time

During a skylight replacement, your roofer removes the shingles around the skylight to re-flash and seal the window to the roof deck or curb. So, the most ideal, cost-efficient time to replace a skylight is when you re-roof and the old shingles are removed to lay down new ones anyway.

2 Improved Energy Efficiency

VELUX continually develops and tests our skylights to ensure the highest standard of design. Our Standard Safety Glass and advanced LoE glazings provide the best balance of daylight, protection, and heat control. And when you add a shade, you can boost the energy efficiency of your entire skylight system by up to 45%!

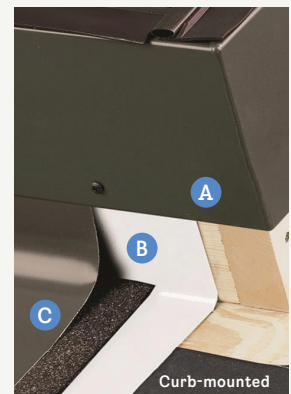

3 Coincide Warranties

VELUX skylight systems implement our patented three layers of protection to ensure a watertight seal and give you peace of mind. Our industry-leading warranty covers your skylight and its installation against leaks for 10 years* and glass protection for 20 years. If you replace your skylights when you re-roof, you can coincide your skylight and roof warranties for better overall protection.

Three Layers of Protection

A Deck Seal

Pre-attached deck seal on all deck-mounted skylights provides a seal between the skylight and roof deck. Curb-mounted skylights feature a pre-attached gasket that provides a tight seal between a site-built curb and the skylight.

B Underlayment

Adhesive underlayment for secondary water protection against the harshest weather conditions.

C Flashing

Engineered flashing for easy installation and primary water protection.

*Velux flashing required. Visit veluxusa.com/weathertight for more information.

Go Solar, Boost Energy Efficiency!

When you replace your existing skylights with VELUX solar-powered skylights, shades, and other accessories, you upgrade the daylight in your home with our most sustainable line of products. Instead of using your home's electricity, our solar-powered skylights and shades use the power of the sun and rechargeable battery-powered motors to open and close.

VELUX Solar Powered Fresh Air Skylights

- Solar-powered venting skylight with integrated solar panel and battery, rain sensor, and insect screen
- Compatible with preinstalled solar-powered skylight shades for added light and temperature control
- Pair with VELUX ACTIVE to monitor indoor air quality and automate or manually control skylights and shades with your cell phone
- Venting capabilities allow you to access fresh air benefits like better ventilation, energy savings, and a healthier living environment

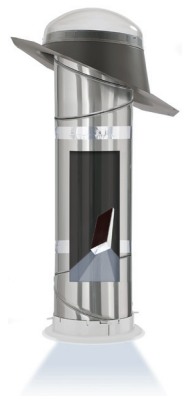

VELUX Solar Powered Skylight Shades

- Solar-powered skylight shades with integrated solar panel and battery operator
- Standard white room-darkening shade* can be preinstalled with skylights for easy installation and immediate use
- Provide light control to prevent glare and temperature control to prevent excessive heat gain through skylights

VELUX Sun Tunnel® Skylight with Solar Night Light

Do you have other places in your home that could use a little extra daylight? Complete the Go Solar family by adding a Sun Tunnel with Solar Night Light to your replacement project! The VELUX Sun Tunnel is a tubular skylight and economic option for adding more natural light to smaller spaces in your home. Paired with the Solar Night Light, a Sun Tunnel lights your space with sunlight all day and a moonlike glow all night for consistent, electric-free lighting.

*Additional custom color shades available for special order.
