

The VELUX logo is displayed in white, bold, sans-serif capital letters on a red rectangular background.A split-screen image showing a hallway during the day and at night. The left side is brightly lit, while the right side is dark, with a circular light fixture glowing. A central label reads "Day | Night".

Day | Night

The VELUX Sun Tunnel Solar Night Light

Produces low-level light after the sun sets so you can enjoy light day and night.

This low-profile night light consists of a 3" x 7" solar panel that charges two 'AA' batteries, which power a series of LED lights. The three LEDs diffuse low-level light automatically when no daylight is detected, thereby providing enough light to navigate any late-night trips to the bathroom or kitchen!

- Mounts discreetly in seconds
- Charges in under six hours in ideal conditions¹
- Provides light for 72 hours when fully charged
